Register to the mobile app

If a child is under 14 years old, an adult registers first. Create a password that is 8 characters long, includes uppercase and lowercase letters, a number and a special character.

The child registers with own phone and the parent can then add the childs profile in Manage Family settings. The mobile app can be used also only with the adult's phone.

Scan the appliance

There is a QR code at the bottom of the box. Scan it to add your child's My LM-Activator™.

Notice that only My LM-Activator™ is compatible with the mobile application.

Set the timer for nighttime and daytime use times given by dentist

Timer settings: set the times for night and possible daytime use. This way the app reminds to put the appliance in the mouth.

Timer: When the child puts the appliance to mouth, press Start and when taking it out, press Stop or Pause. The data is saved to the Logbook, which can be shown to dentist.

PRO functions are additional services ordered by the dentist and the availability varies due to the service provider. (Ortho Book Pro)
